## CAREER OVERVIEW

To grow with the company where i can effectively contribute my software skills as professional. I always want to learn as much as i can. I will give everything i can offer for the sake of the company.

## EXPERIENCE

### Academic Project

- Train Ticket Reservation System :- Language used Java

Developed and implemented an online bookstore system using Java, Spring Framework, and MySQL. Streamlined inventory management, order processing, and user interactions.

- Flashlight App :- Tools used Android Studio, Java, XML

Developed a feature-rich Flashlight app for Android devices, providing users with an intuitive and reliable tool to use their phone's camera flash or screen as a light source. The app included various lighting modes, a user-friendly interface, and efficient performance.

- Freelance Website :- Tools XAMPP, PHP, MySQL, HTML, CSS, JavaScript

Developed a comprehensive Freelance website similar to Fiverr and Freelancer, enabling users to offer and hire services efficiently. The platform included features for job posting, bidding, user profiles, secure transactions, and communication tools.
